

## Privacy Policy

Soficopharm has a legal responsibility to monitor the safety of all Soficopharm Products that we have in distribution in Egypt.

Such monitoring of adverse events is called Pharmacovigilance ("PV"). PV requirements exist to allow us to manage adverse events and to protect public health and ensure high standards of quality and the safety of Soficopharm Products.

Our Pharmacovigilance obligations require us to process certain information, which allow to directly or indirectly identify a person, ("Personal Data") of a patient and/or the reporter of an adverse event that we receive in order to comply with strict obligations to report suspected adverse reactions.

This Pharmacovigilance Privacy Statement provides important information to you about how we process Personal Data for PV purposes, in line with our obligations under applicable data privacy laws.

All Personal Data is processed exclusively for PV purposes and only where relevant and appropriate to document, assess and report your adverse event properly in accordance with our Pharmacovigilance obligations.
